

AerEthos

Product Environmental Report

Signature Yearbook, hardback

Date introduced: May 2026

Materials

94% FSC-certified paper in the book block¹

6% recycled or responsibly sourced wood fibre

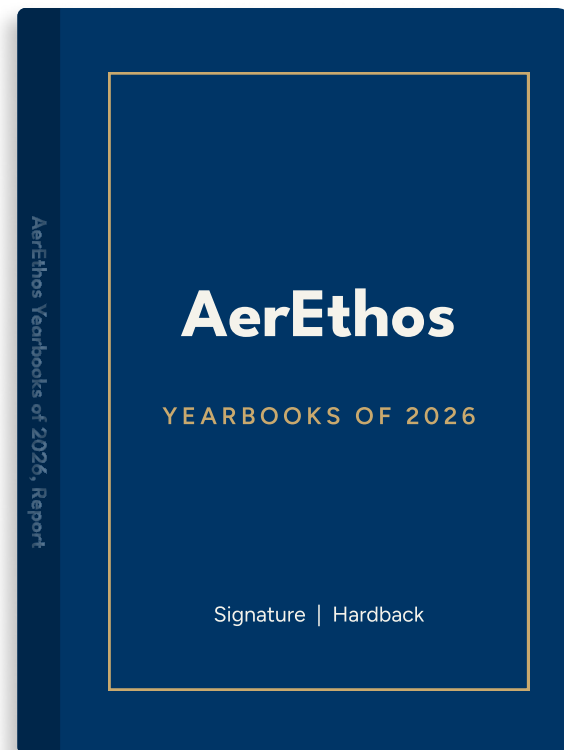

Smarter chemistry³

- Vegetable-based inks used throughout
- Water-based binding adhesive
- PVC-free cover materials

Longevity

A hardback with sewn binding, made to be kept.

Each copy is a keepsake for the graduating year, built to survive a lifetime of shelves and moves.

Made to order

Printed after students order. Production runs are set once a school has signed and orders are in, so there is no unsold stock. Every year group runs at the same time.

Responsible packaging

53% fibre-based, with no plastic wrap²

47% recycled or responsibly sourced cardboard

Recovery

The paper block and cardboard carton can go into household paper recycling.

Every AerEthos yearbook is printed to order on 94% FSC-certified paper

This report includes data current as of the product introduction date. Evaluations are based on the Irish configuration of the Signature hardback yearbook.

¹ By weight of paper in the book block. ² Cardboard carton, by weight. ³ Declared by the print partner.

aerethos.com

Greenhouse gas emissions

~2.5kg CO₂e

per book, across its full lifecycle

What we are measuring next

- Record FSC chain-of-custody numbers for every paper stock we use
- Calculate a verified carbon footprint per book with our print partner
- Review the cover lamination for a more recyclable alternative
